Recycling ist Trend – auch im
Gebäudesektor

Gildas Höllmüller – Founder ENGA GmbH

Need different handling of plastic resource

- Worldwide annual plastic production = 450 million tonnes (2019)
=> 2.25 billions tonnes CO₂
- of 5.8 billion tonnes no longer in use, **~9% was recycled**

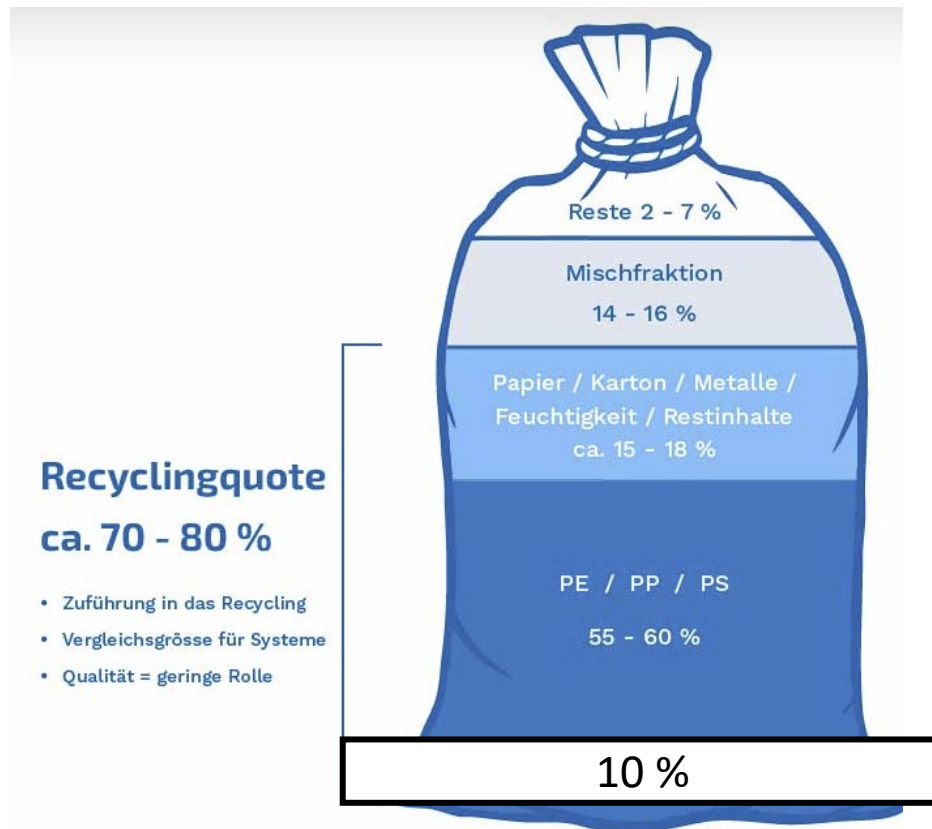

- 125 kg plastic waste/ per person / year in Switzerland (2019)
-> [135 kg in 2030]

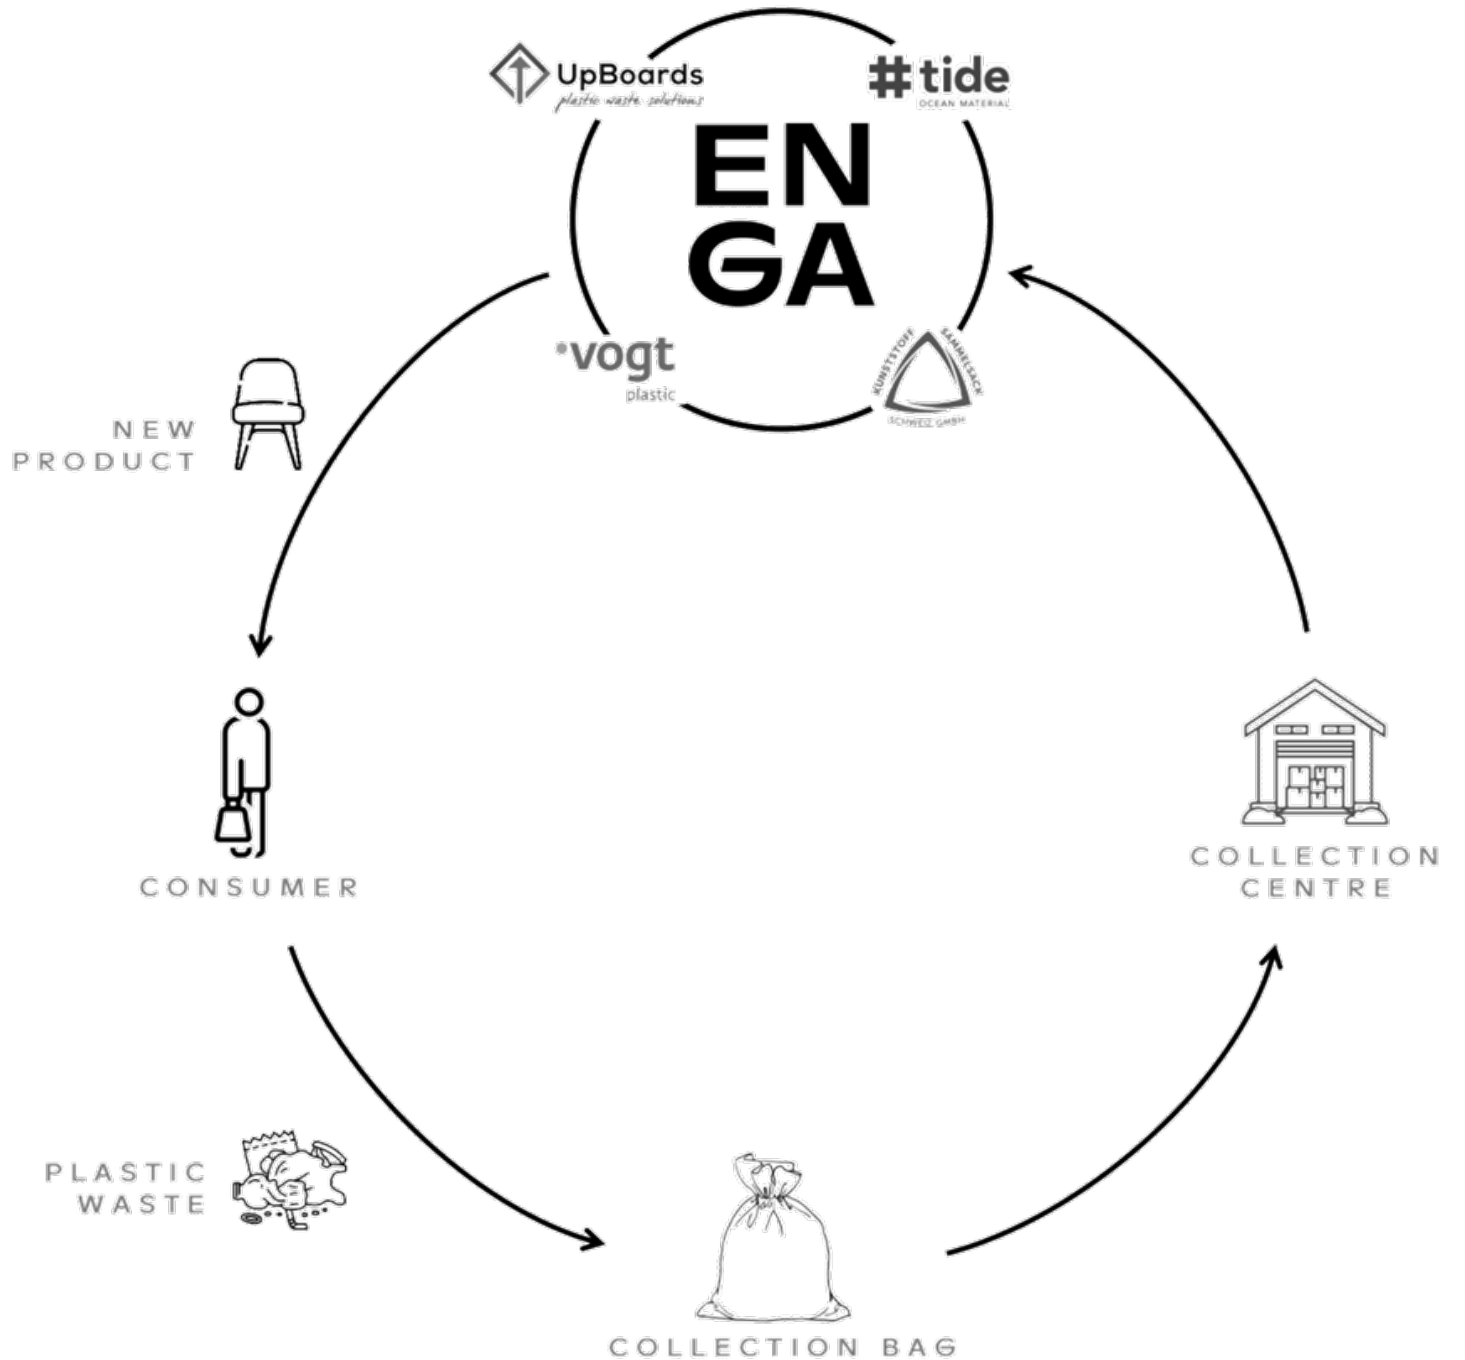

Plastic waste is a resource.
We manufacture high added value products with it.

With 10% of the 125 kg/person & year plastic waste of 60'000 habitants in Biel/Bienne, we have the resource to manufacture 150'000 chairs!
